

## CONTENTS OF VOLUME 9

### *Numbers 1 & 2*

#### **Special Issue on Soil–Structure Interaction**

Editorial . . . . .	1
A Constitutive Model for Rock Joints Formulation and Numerical Implementation A. GENS, I. CAROL & E. E. ALONSO (Spain)	3
Modelling of Soil–Structure Interface Behaviour: A Comparison between Elastoplastic and Rate Type Laws . . . . . M. BOULON (France) & R. NOVA (Italy)	21
A Constitutive Model for Cyclic Behaviour of Interfaces with Variable Dilatancy D. AUBRY, A. MODARESSI & H. MODARESSI (France)	47
Numerical Modelisation of Contact with Friction Phenomena by the Finite Element Method . . . . . R. CHARLIER & A. M. HABRAKEN (Belgium)	59
Numerical Simulation of Penetration in Sand Based on FEM . . . . . Z. SIKORA & G. GUDEHUS (FRG)	73
Localisation in the Presence of Excess Porewater Pressure . . . . . D. A. SHUTTLE & I. M. SMITH (UK)	87
Foundation Uplift and Radiation Damping Effects Calculated in the Laplace Domain . . . . . G. SCHMID (FRG) & P. HILLMER (Switzerland)	101
Dynamic Response of Two-Dimensional Flexible Foundations Allowed to Uplift R. ABASCAL & J. DOMINGUEZ (Spain)	113
Calendar of Events . . . . .	131

### *Number 3*

Axial Response Analysis of Piles in Vertically and Horizontally Non- Homogeneous Soils . . . . . C. Y. LEE & H. G. POULOS (Australia)	133
---	-----

357

Time-Dependent Rock-Shotcrete Interaction: A Numerical Shortcut . . . . .	149
R. PÖTTLER (Austria)	
Consolidation Analysis of Symmetrically Loaded Strip Footings on a Poroelastic Layer . . . . .	171
R. KARPURAPU, A. P. S. SELVADURAI & R. E. S. TANOESOEDIBJO (Canada)	
Elasto-Plastic Constitutive Modeling of Plain Concrete and an Optimization Procedure for Parameter Evaluation . . . . .	185
Y. M. NAJJAR, M. M. ZAMAN & M. O. FARUQUE (USA)	
Analysis of Tunnel Distortion Due to an Open Excavation in Jointed Rock . . . . .	209
J. P. CARTER & H. ALEHOSSEIN (Australia)	
Book Reviews . . . . .	233
Calendar of Events . . . . .	239

#### *Number 4*

A New Finite Element Formulation for One-Dimensional Analysis of Elastic-Plastic Materials . . . . .	241
H. S. YU & G. T. HOULSBY (UK)	
Validation of an Elastoplastic Model for Chalk . . . . .	257
J. F. SHAO & J. P. HENRY (France)	
Numerical Analysis of Axially Loaded Vertical Piles and Pile Groups . . . . .	273
J. T. CHIN (Australia), Y. K. CHOW (Singapore) & H. G. POULOS (Australia)	
Piles under Axial and Torsional Loads . . . . .	291
M. GEORGIADIS & S. SAFLEKOU (Greece)	
Traveling Wave Effects on a Tall and Narrow Building: Observation and Analysis . . . . .	307
T. SUGIYAMA, K. MAEDA & M. KANEKO (Japan)	
<b>Technical Notes</b>	
A Comparison between the Stresses Computed for Finite Sized Precast Concrete Pavement Units Using Westergaards Equations and a Numerical Design Method . . . . .	325
J. W. BULL & A. SINGH (UK)	
Application of Distinct Element Analysis to Three Simple Block Models Aimed at Practical Application to Toppling Failure of Fissured Rock Slopes . . . . .	341
T. ISHIDA (Japan)	
Calendar of Events . . . . .	355
